Subject: ACII and MSc in Insurance and Risk Management

Dear Sirs,

Good day to you.

It gives me immense pleasure in informing you that I have attained the ACII qualification. I have also completed my MSc in Insurance and Risk Management (securing Distinction) from Cass Business School- City University, London.

However, all this would not have been possible without the continued help and support of my parents, teachers and friends and I am grateful to all of them

With respect to the above qualifications, I must thank IIRM in particular for its efforts in making this happen.

Firstly, the programme had given me an advantage over my classmates during the course of my MSc. One can appreciate the obvious difference in the teaching methods between the two cultures. The UK system depends largely on one's own initiative, ideas and efforts. In this context, my diploma had actually added value to the quality of research undertaken and was commended by both my student colleagues and the faculty.

I must admit that the previous year had witnessed many drastic movements and has changed our lives in ways more than one. London in particular has been largely affected by the crisis and has affected the employment opportunities of many graduates; especially, in the financial services sector. Under such difficult conditions, I have been able to achieve the ACII qualification only on account of your continued efforts in securing the discounted fees towards obtaining the qualification.

The ACII is one of the most respectable qualifications in the London market. Going forward, I am sure this will help in shaping my career.

I owe my sincere gratitude to you and all the teaching and non teaching staff at IIRM. As part of my Continuing Professional Development Programme (CPD) leading to my Fellowship qualification, I have undertaken CII modules that I intend to appear for this summer at the Hyderabad center. I look forward to meeting you then.

Many thanks and Best Regards,  
Gautam
